

Where can I find the uninstaller

If everything is normal, you can find the uninstaller in the Startmenu entry. Goto "Start" ⇒ "Programms" ⇒ "GECAMed" ⇒ GECAMed Uninstaller

If you have a version of GECAMed installed that is smaller than 1.0.2, you will not have an uninstaller. It was added in version 1.0.2 Therefore you have to download the `gecamed_uninstaller_1.0.1.zip` separately from [here](#). Extract the folder `uninstall` in your GECAMed install folder and run the `GECAMed_Uninstall.bat` from this folder. It will remove the GECAMed application.
