

GECAMed - Gestion de Cabinets Médicaux

Innovative Open Source Software Solution for Medical Offices

The GECAMed “Gestion de Cabinets Médicaux” project was developed with the help of general practitioners to get luxemburgish doctors out of the “vendor lock” that holds them and their patient data prisoner. More information about the story behind GECAMed can be found [here](#).

GECAMed is Open Source software with a [GNU LGPL \(Lesser General Public License\)](#). The sources are provided via a link on our [download page](#), or by sending us your request [on our mailing list](#).

News

- **12.11.2015** GECAMed 2.04.00 has been released.
Check the Release Notes here: [Release_2.04.00](#)
- **01.01.2015** The CNS changed the coefficients of some tariffs. Please find an update to correct the nomenclature of your GECAMed [here](#). Please ask your support company how to handle this update.
- **24.11.2014** GECAMed 2.01.02 has been released.
Check the Release Notes here: [Release_2.01.02](#)
- **01.07.2014** GECAMed 2.00.06 has been released.
Check the Release Notes here: [Release_2.00.06](#)
- **14.01.2014** New security restrictions in Java 1.7.0_51 cause trouble to start GECAMed.
See [here](#) for more details.
- **25.09.2013** GECAMed 1.5.0 has been released.
Check the Release Notes here: [Release_1.5.00](#)
- **12.06.2013** GECAMed 1.3.03 has been released.
Check the Release Notes here: [Release_1.3.03](#)
- **05.07.2012** GECAMed 1.2.04 has been released.

Concepts

- Open Source software solution for managing medical office data
- Developed in close collaboration with physicians
- Multi-user application with customizable profiles (Physician, Secretary, Administrator,...)
- Multi-lingual user interface, currently available in English, German and French.
- Modern, scalable application server architecture, i.e. GECAMed can be used for:
 - Small medical practices with a single physician
 - Medium medical offices with multiple physicians and secretaries
 - Large medical houses distributed over multiple sites
- Interoperability through international standards such as HL7 and IHE

Features

- Management of administrative patient data
- Medical history of patient, with attached documents
- Fully integrated access to the national DSP service (dossier de soins partagé)
- Prescription module allowing:
 - Custom prescription templates
 - Free text or assisted capture
 - Possibility to insert medication lists (CEFIP)
 - Prescription history
- Follow-up of medical treatment
- Standard letter generation based on customizable templates
- Multiple agendas with support for doctena.lu on-line booking
- Multiple waiting rooms
- Alerts and warnings for important patient data
- Billing module with a complete invoice workflow and CNS rule compliance checking and correction
- Customizable invoice templates for often used tariff combinations
- Integration of medical images (DICOM) via CD/DVD
 - Visualisation of medical images
 - Integration of significant images into medical record

Advantages

- Free and Open Source Solution
 - No Licence Fees
 - Source code available
- Multi-platform. Runs on Windows, Mac OSX and Linux
- Easy installation and configuration
- Import of patient data from existing software solutions
- Complete solution
- Independence of physician: More than one IT company can offer support for a GECAMed installation
